Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

	A, Title: Purification and characterization of thin, aggregative fimbriae from Salmonell
	A; Reference number: A44898; MUID: 91310586; PMID:1677357
_	A:Contents: 27655

A;Contents: 27655
A;Accession: A4898
A;Accession: A4898
A;Accession: A4898
A;Accession: A4898
A;Residues: 21-33 <C03>
A;Residues: 21-33 <C03>
A;Acession: agray
C;Genetics: agray
C;Genetics: agray
C;Function: major component of thin aggregative fimbriae
A;Description: major component of thin plasminogen, tissue plasminogen activator
C;Function: Eimbriae bind to fibronectin, plasminogen, tissue plasminogen activator
C;Keywords: fimbria
F;1-20/Domain: signal sequence #status predicted <SIG>
F;21-151/Product: fimbrin protein agfA #status experimental <WAT>

A, Description: minor component of wild-type curli, interaction between CsgA and CsgB tr A,Note: curli are thin, coiled fibers expressed on the surface of Escherichia coli that and H-kiningeni in the absence of CsgA, CsgB can self-assemble into polymers
F;1-21,Domain: signal sequence #status predicted <SIG>
F;22-151/Product: minor curlin chain #status predicted <MAT>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          - Escherichia coli (strain O157:H
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         J.D.; Rose, D.J.; Mayher

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Curlin nucleator protein csgB precursor - Escherichia coli (strain K-12)

NiAlternate names: csgB protein; curlin nucleation component; minor curlin protein
C;Species: Escherichia coli
C;Species: Escherichia coli
C;Species: Escherichia coli
C;Species: 12-Feb-1998 #sequence_revision 20-Feb-1998 #text_change 01-Mar-2002
C;Accession: S7078; F6484 Es
Mol. Microbiol. 18, 661-670, 1995
A;Rithe: Expression of two csg operons is required for production of fibronectin- and Cc
A;Reference number: S70783; MUID:96414468; PMID:8817489

PER JONGTION: ESSENITIAI LOS DISCIPLIANTS AUGUSTONS.

PER JOSSE laads to shortened circadian rhythms; an increase in period length of circadian rhythms and a decrease leads to lengthened circadian rhythms and a decrease leads to lengthened circadian rhythms and a decrease rhythmic ty of locomotor activity, eclosion behavior, and for the rhythmic component of the male courtship song that originates in the thoracio nervous system. The biological cycle depends on the rhythmic component of the male courtship song that originates in the thoracio nervous system. The biological cycle depends on the rhythmic formation of PER, Nuclear activity of the heterodime of the TIM-PER complex. Light induces the degradation of TIM, which promotes elimination of PER, Nuclear activity of the heterodima accordinatively regulates PER and TIM transcription through a negative feedback loop. Behaves as a negative element in circadian transcriptional inhibition (By similarity).

SUBUNIT: Forms heterodimer with timeless (TIM); the complex then transcriptional inhibition (By similarity).

First accumulates in the perinuclear region about one hour before transcription into the nucleus. Interaction with TIM is required for, nuclear localization (By similarity).

THE: STABILITY OF PER MONOMER AND IN THE FORMATION OF HETERODIMER PER-TIME PROPHER AND IN THE FORMATION GOMES HERE ARMY-SIM) dimerization domains.

SIMILARITY: Contains 1 PAS-associated C-terminal (PAC) domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     This SWISS-PROT entry is copyright. "DNA sequence of genes 38 encoding a receptor-recognizing protein of
Dacteriophages T2, K3 and of K3 host range mutants.";
J. Mol. Biol. 194:31-39(1987).
-!- FUNCTION: Vg38 is at the tip of the long tail fibers and serves as
the phage recognition site for the cellular receptor.
-!- MISCELLANBOUS: THIS PHAGE USE OUTER MEMBRANE PROTEINS OMPF AND TTR
AS RECEPTORS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       MEDLINE-89255387; PubMed=2722818; Delepelaire P., Wandersman C.; "Protease secretion by Erwinia chrysanthemi. Proteases B and C are
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Bacteria; Proteobacteria; Gammaproteobacteria; Enterobacteriales;

J. Bidl. Chem. 264:9083-9089(1989).
-!- COFACTOR: Binds 1 zinc ion and 7 calcium ions per subunit (By similarity).
-!- SUBCELLULAR LOCATION: Secreted.
-!- DOWAIN: THE GLY-RICH REPEATS MAY BE IMPORTANT IN THE EXTRACELLULAR SECRETRON OF THIS METALLORPOTRASE.
-!- SIMILARITY: Belongs to peptidase family M10B. | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | PEPOIDIGASE | MICHEPPO: | PRO006025 | PEPLIGASE | MICHEPPO: | PRO006025 | PERLOCATION | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | MICHEPPO: | ZINC (CATALYTIC) (BY SIMILARITY).

Recombinant agfA gene having a segment replaced by a foreign DNA sequence which encodes foreign epitope or antigen, expresses recombinant AgfA protein useful for eliciting immune response in animal. The present invention describes a recombinant agfA gene (I) where a segment of the gene has been replaced by a segment of a foreign DNA sequence which encodes a foreign epitope or antigen. Also described are: (1) use of thin aggregative fimbriae (BEFIT/TAF) nucleation depended assembly system of strains of Salmonella, Bscherichia coli and Enterobacteriaceae for the production of fimbriae comprising recombinant AgfA. CsgA and AgfA-homologue fimbrin subunits, respectively; (2) directing recombinant gene into the chromosome of the homologous species; (3) directing recombinant of a recombinant gene back into the chromosome of the homologous species; replacing the native Salmonella; agfA; chromosomal gene replacement; fimbrin; epitope; AgfA::PT3#3 amino acid sequence SEQ ID NO:16. ```
copy of that gene; and (4) eliciting an immune response in an animal, comprising separating an amino acid polymer comprising a recombinant AgfA protein containing a replacement segment or segments of foreign amino acid sequence or sequences grown on a Salmonalla, E. coli or Enterobacteriacese host cell, from the host cell and introducing the polymer into the animal in conjunction with a carrier or diluent (1) is useful for the expression of recombinant AgfA protein which is useful foliciting an immune response in an animal. In a finbrial presentation system the heterologous antigens are presented in high numbers (up to 500,000 copies/cell), the hybrid fimbrin protein possesses both the immunogenicity and adhesion properties relevant for an efficient live vaccine, the carrier fimbrial subunit proteins are usually strong immunogens, which may be important for directing an immune response against the inserted epitope, and hybrid fimbriae are easy and inspensive to purify in large amount. The present sequence is given in the exemplification of the present invention
                                                                                                                                                                                                                                                                                                                                                    o;
